# PBG NETWORKS

*We Make IT Work!*

## PBG Networks Vitals:

Type: Private

Industry: Information Technology

Founded: 1996

Headquarters: Wenonah, NJ

Website: [www.pbgnetworks.com](http://www.pbgnetworks.com)

Twitter/Facebook: @pbgnetworks

Lisa Brousseau, President and CEO

Scott Brousseau, CTO

Patricia Bennett, Founder

PBG Networks was founded in 1996 and is an enterprise solutions and infrastructure services firm focused on systems integration. We implement innovative and proven solutions to transform client requirements into custom client solutions designed to meet the most demanding business and technical needs.

We are a New Jersey Women's Business Enterprise (WBE) and recipient of the Federal Government's Commander's Medal.

At PBG Networks, our experienced team uses a proven approach and hands-on relationship style to deliver the right solution so you derive the maximum value.

## Products/Services

- Virtualization and Containerization
- Security and Firewalls
- Cloud Backup and Recovery
- Switching and Wireless
- Managed Datacenter Services
- Structured Cabling
- Hyperconverged Infrastructure
- Optics
- Azure Stack

### Switching and Wireless:

From core switching to wireless IoT, we focus on end-to-end networking solutions to bring you everything you need for performance, security, and ease of management.

### Hyperconverged Infrastructure:

After 10 years in hyperconverged architectures, we see the value beyond the performance increases. Routine IT tasks are simplified and downtime reduced. Hyperconverged can take many forms, and our engineers will build a solution that matches your needs.

### Virtualization and Containerization:

PBG Networks has been implementing virtualization with VMware since 1998. Would you benefit from a virtual desktop infrastructure? When do you virtualize and when should you use containers? Our experience will ensure you get the right answers.

### Managed Services:

PBG Networks can offer your organization custom designed services package based on your technology needs and budget. We can provide on-going support of all or part of your datacenter through our Client Care packages, or we can meet a more limited need with hours, based support.

### Optics:

PBG Networks optics are produced by the same contract manufacturers that make them for the major switching vendors. We bring them to you with greater reliability and less expense. Whether you need SFP or QSFP28, fiber or direct attach, our specialists will get you the best optics in the industry.

## Our History

The Patricia Bennett Group (PBG) was founded in 1996 and quickly became an industry leader in the IT space, seeking to expand the company's product portfolio to encompass enterprise security.

In March 2005, PBG acquired ATC, a leading provider of information assurance and integration services to the Federal Government responsible for deploying a full-mesh network consisting of 110 site-to-site connections that facilitated data transfer among the Federal Government and their strategic partners.

In October 2010, PBG changed their name to PBG Networks, a name which reflects the company's current emphasis on crafting reliable, high performance network and virtualization solutions and hybrid cloud computing.

## There is so much more to talk about:

- Structured Cabling
- Security
- Firewalls
- 3-2-1 Backup and Disaster Recovery

We would be happy to discuss your needs further and assess your environment.
