

We Make *IT* Work!

Protect your K-12 District with simple, powerful access security

We're PBG Networks and Duo MFA is our specialty. Duo is designed to safeguard all users, devices, and applications — so you can stay focused on what you do best: educating your students.

**White Glove Onboarding
with PBG Networks**

**We will guide you during
your deployment, and make
sure you are proficient at
MFA when we leave**

**We don't limit how many
apps you can protect**

Standard Duo MFA Package

Our Standard Duo MFA package provides complete coverage for your Duo rollout. PBG will setup and configure your Duo MFA including:

- Setting up Duo MFA account portal
- Configuring Duo MFA admin portal settings and policies
- Integrating AD, SSO, and SAML
- Onboarding user accounts and Duo Tokens into Duo portal, including sending enrollment e-mails (CSV required)
- Protecting any supported local and hosted applications and systems, for example:
 - Google and GSuite, O365, Azure, Genesis, Systems3000, etc.
 - Firewalls, backups, and other systems
- Protecting RDP and/or UAC on all physical and virtual Microsoft Windows servers joined to your domain (if required)
- Deploying Duo Proxy (if required)
- Offering support directly to your IT staff during deployment
- Hands-on training for IT staff and documentation

What if you want more time to complete your Duo MFA rollout? Continue your project with PBG on a “Time and Materials” basis per day.

Desktop Duo MFA Package

This Desktop Duo MFA package covers schools that are looking for an extra layer of security by covering their Windows machines with Duo MFA. Some requirements are:

- Application deployment software must be available, or PBG Networks can provide their own deployment tools – at no additional cost!
- All workstations must be on your domain and must not be out of vendor lifecycle.

Tier 1 Duo MFA Package

Looking for support and upgrades post-installation? Our Tier 1 Duo MFA package provides unlimited support tickets for break/fix issues related to Duo MFA. We can also upgrade your Duo MFA application on servers and domain-joined workstations annually.
